

## Welding Advisory Committee Minutes

**Date:** May 27 ,2014 5:30

**Members present:** Bill S., John N., Dave C., Larry L., Rich C., Bob G.

**Meeting Minutes:** Lab tour new equipment overview.

Lincoln Multi process – New power source feeder system – Agreed to incorporate STT into advanced 255 course. Members unanimous on degree of flexibility of use in different processes. Brings modular process concept to program.

Lincoln Aspect TIG systems – Comparable to Miller Dynasty systems. John N. liked layout of control systems. Members unanimous in disappointment about wireless foot controls being recalled for redesign by Lincoln so not available this year.

Lincoln Teaching robotic system – Adds a robotic welding component to 265 automation. Provides a potential marketing tool for the program. Members liked the small footprint and modular packaging making the system portable.

Meeting adjourned: 7:00
