

Career and Technical Education (CTE) Advisory Committee Meetings
Tuesday, April 5th, 2022
5:30 PM – 7:30 PM

- I. Welcome and General Session (5:30-6:00)**
- a. Career and Technical Education Center Updates
 - b. What is Career and Talent Development?
 - c. Advisory Structure
 - d. Next Steps – May 2nd and 3rd

II. Breakout Rooms (6:00)

Committee Name: Automotive Technology, 47.0604

III. Certification Discussion (6:10)

Notes: GST/MLR from ASE an area to focus on, ASE professional level might not be realistic, state of Michigan looking to put state testing into schools, much rather see students earning the state certification than trying for professional level ASE, state tests are starting to be much better aligned with ASE curriculum, brakes and then steering/suspension are the extra components to add in addition to MLR, ASE master tech is responsibility of dealer, state of Michigan has 9 categories for testing – brakes and steering/suspension are two focus areas. Consider HVAC EPA 609 certification.

IV. Current CTE Curriculum Review (6:30)

Notes: Students need to be using laptops, MLR starts at a basic enough level for students that have never opened a hood before, AC identifiers piece of equipment to consider.

V. Reconvene Group (7:20)

Notes:

Parking Lot Items: One year verse two-year program, exposing students to layers of opportunities in car dealership. How can advisory partners help reinforce 21st century skills learning.

VI. Next Steps (7:25)

- a. Lab Layout May 2nd and 3rd
- b. Thank you!
